

# **Weed Washing**

as taught by Travis Petersen, The Nomad Cook

## **Ingredients**

- dried cannabis, preferably trim/shake/sugar leaf

## **Instructions**

- Weigh out the desired amount of dried cannabis and place in a bowl or measuring cup.
- Add ice to the bowl.
- Cover the ice and cannabis with water.
- Keep in your fridge for around 12 hours and then strain with a sieve.
- Put the strained cannabis back in your bowl and add fresh ice and water.
- Repeat this process every 12 hours for 2-3 days. The strained water will start to look clear.
- After soaking and straining for 2-3 days, strain again.
- Add the strained cannabis to a pot of boiling water and let it boil gentle for 5 minutes.
- Strain the water once final time and squeeze out excess water. A salad spinner can help with this.
- Use within a few days in your infusion.

## **Notes**
